## HOW THE IMEA INCENTIVE REBATE PROGRAM OPERATES FOR MUNICIPALLY MANAGED RESIDENTIAL AIR SOURCE HEAT PUMP and/or CENTRAL AIR CONDITIONING PROGRAMS

1. ***IMEA Member Municipal Utilities use this application to set aside a specific amount of their IMEA Electric Efficiency Program Funding for a locally administered residential air source heat pump and/or central air conditioning program.***

IMEA Members may use some or all of their Electric Efficiency Program funding to establish a locally managed program to incentivize the installation of qualified residential air source heat pumps and/or central air conditioning units.

The Member may choose to:

- a) Establish only a residential air source heat pump program.
- b) Establish only a residential central air conditioner program.
- c) Establish both a residential air source heat pump program and a residential central air conditioner program.
- d) Establish neither program: Using any part of the city’s IMEA Electric Efficiency Program funding to establish any locally administered residential electric efficiency program is optional and up to the municipality to decide.

Qualified Air Source Heat Pumps (ASHPs) for this Program Are (see TRM 14.0, Vol 3, 5.3.1):

Qualified units for this program are new residential sized (greater than 3 tons but  $\leq 65,000$  Btu/hr) air source heat pumps that accompany the removal of functioning components of the electric AC **and/or** the gas heating systems from service prior to the less efficient components’ natural end of life, and replacement with a new high efficiency air source heat pump unit. NOTE: The resident may choose to replace both the current electric AC and the gas boiler or furnace. Or, the resident can choose to retain the current gas boiler or furnace as a backup for the ASHP.

Incentives are according to this schedule:

Residential Air Source Heat Pumps (ASHPs)	
Efficient Measure Type	Incentive
Ducted or Ductless Air source heat pump (not replacing gas boiler or furnace): SEER2 $\geq 15.2$ , EER2 $\geq 11.4$ , HSPF2 $\geq 8.1$ Tons < 3	\$900
Ducted or Ductless ASHP (Replacing Gas Boiler/Furnace) SEER2 $\geq 15.2$ , EER2 $\geq 11.4$ , HSPF2 $\geq 8.1$ Tons < 3	\$900
Ducted or Ductless ASHP (Not Replacing Gas Boiler/Furnace) SEER2 $\geq 17$ , EER2 $\geq 12.0$ , HSPF2 $\geq 8.5$ Tons $\geq 3$	\$1,400
Ducted or Ductless ASHP (Replacing Gas Boiler/Furnace) SEER2 $\geq 17$ , EER2 $\geq 12.0$ , HSPF2 $\geq 8.5$ Tons $\geq 3$	\$1,800
<b>NOTE:</b> Minisplit ASHPs are not incentivized in the IMEA program	

Qualified Central Air Conditioners for this Program Are (see TRM 14.0, Vol 3, 5.3.3):  
 A residential sized ( $\leq 65,000$  Btu/hr) central air conditioning that replaces an operable, less efficient existing unit. Incentives are according to this schedule:

Central Air Conditioner	
Efficient Measure Type	Incentive
Central Air Conditioning SEER2 $\geq 15.2$ , Tons $\leq 5$	\$700

2. **IMEA reviews the pre-application and, when all is in order and acceptable, issues a Notice to Proceed**, which sets aside an amount of the Member’s IMEA Electric Efficiency Program Funding as a reimbursement for incentives that the city makes to residents who participate in the municipal air source heat pump and/or residential central air conditioning program.

With the Notice to Proceed, the local program manager will also receive a copy of the Energy Savings Calculator for air source heat pumps and central air conditioning and may need to complete a training session on its use. The applicant can request the calculator before making a pre-application.

3. **The city creates and manages the residential air source heat pump and/or central air conditioner program for its residential customers.** Specifically, the municipality:
  - Creates customer-facing application forms, advertises the program to residents, administers the program and tracks program uptake and deemed energy savings achieved. **NOTE:** The city is responsible for assuring that the total amount paid as incentives to residential customers does not exceed the amount authorized by IMEA in the Notice to Proceed. (The city’s residential air source heat pump and/or central air conditioner program either must end once all the allocated funds are distributed to residents or the city can amend its pre-application to set aside more of its electric efficiency funds for the program.)
  - Takes in applications from its residents and approves or rejects them.
  - As part of the approval process, the city verifies the purchase and installation of qualified units at qualified city residences.

4. **The city keeps data in the form of a spreadsheet.**  
 These Excel spreadsheets must be turned in to IMEA as part of any request for reimbursement of the incentives that the utility pays to residential customers.

For the Air Source Heat Pump Measure, Spreadsheet Data Columns May Include:

- The name of the resident.\*
- The qualified residential location.\*
- The make (e.g. Trane, York etc.) of the air source heat pump (gathered from receipt or sales slip)\*
- The model number (if possible) of the air source heat pump (gathered from receipt or sales slip)\*.
- Year of manufacture of the air source heat pump.
- The installation date of the air source heat pump (gathered from receipt or sales slip).\*
- The purchase price of the air source heat pump (gathered from receipt or sales slip).

- The cooling capacity of the air source heat pump (in Btu/hr).\*
- The heating capacity of the air source heat pump (in Btu/hr).\*
- Whether the heat pump is Ducted or Ductless (NOTE: The IMEA program does not include minisplit air source heat pumps.)\*
- Whether the resident retains an existing gas furnace or boiler for back-up heating.\*
- The Seasonal Energy Efficiency Ratio (SEER2) of the air source heat pump.\*
- The Energy Efficiency Ratio (EER2) of the air source heat pump.\*
- The Heating Seasonal Performance Factor (HSPF2) of the air source heat pump.\*
- The amount of the incentive paid to the resident.\*
- The method of the incentive paid to the resident (e.g., check or bill credit).
- The date the unit was inspected by the city.
- The date the incentive was paid to the resident.\*
- The annual energy savings attributable to the unit.\*
- The kW savings at the time of city peak (annual demand savings) attributable to the unit.\*

**\* These are required fields/column headings for the spreadsheet.**

**NOTE:** Each incentivized unit is recorded on its own row of the spreadsheet (even if the customer installs – and is incentivized for – more than one unit in the same location).

**NOTE:** Failure to provide all necessary information required for a unit may jeopardize the city's IMEA reimbursement for the residential incentive paid for that unit.

The city keeps this information ready to include with the Final (or no more than quarterly) applications to the IMEA for reimbursement of incentives the city has paid to participating residents.

The city should also retain copies of customer receipts for the purchase and installation of the units (although IMEA does not foresee ever requesting these from the city).

For the Central Air Conditioner Measure, Spreadsheet Data Columns Should Include:

- The name of the resident.\*
- The qualified residential location.\*
- The make (e.g., Trane, York, etc.) of the central air conditioner (gathered from receipt or sales slip).\*
- The model number (if possible) of the central air conditioner (gathered from receipt or sales slip).\*
- The installation date of the central air conditioner (gathered from receipt or sales slip).\*
- The purchase price of the central air conditioner (gathered from receipt or sales slip).
- The cooling capacity of the central air conditioner (in Btu/hr).\*
- The Seasonal Energy Efficiency Ratio (SEER2) of the central air conditioner.\*
- The Energy Efficiency Ratio (EER2) of the central air conditioner.\*
- The amount of the incentive paid to the resident.\*
- The method of the incentive paid to the resident (e.g., check or bill credit).
- The date the unit was inspected by the city.

- The date the incentive was paid to the resident.\*
- The annual energy savings attributable to the unit.\*
- The kW savings at the time of city peak (annual demand savings) attributable to the unit.\*

**\* These are required fields/column headings for the spreadsheet.**

**NOTE:** Each incentivized unit is recorded on its own row of the spreadsheet (even if the customer installs – and is incentivized for – more than one unit in the same location).

**NOTE:** Failure to provide all necessary information required for a unit may jeopardize the city’s IMEA reimbursement for the residential incentive paid for that unit.

The city keeps this information ready to include with the Final (or no more than quarterly) applications to the IMEA for reimbursement of incentives the city has paid to participating residents.

The city should also retain copies of customer receipts for the purchase and installation of the units (although IMEA does not foresee ever requesting these from the city).

5. ***The city incentivizes the resident:*** Incentives may be made to the resident via a check from the city or via a credit on the resident’s utility bill. (**NOTE:** Under this program, IMEA will not make checks to residents. Incentives to residents are the sole responsibility of the city.)
6. ***The city applies for a final (or periodic) incentive reimbursement from IMEA:*** The city may elect to make an application for funds from IMEA either:
  - a) When all funds set aside for the residential air source heat pump and/or central air conditioner program have been distributed to residents, or
  - b) On a periodic (but no more than quarterly) basis, as agreed to by the city and IMEA.

To make an application for funds from IMEA, the city sends a memo to Rodd Whelpley ([rwhelpley@imea.org](mailto:rwhelpley@imea.org)) that includes:

- A request for reimbursement to the city from IMEA and the total amount requested.
- The number of incentivized air source heat pump and/or central air conditioning units for which the city is requesting reimbursement.
- The number of households in which the measures were installed.
- The total energy savings and demand savings achieved by the AC and/or ASHP units for which the city is requesting incentive reimbursement.
- A spreadsheet (or spreadsheets, if the utility is offering both measures) containing (at least) the required data points listed in item 4 above.

**NOTE:** If the city elects to collect funds from IMEA on a periodic basis, then likely only part of the funds set aside by the Notice to Proceed will be paid out in a single period. However, at each period, IMEA and the city will track the total amount of incentives IMEA has paid to the city over the course of the periods thus far and how much of the allocated incentive amount (as reflected in the program’s Notice to Proceed) remains to be used by the city. In total, IMEA will not pay out an amount that is greater than the Notice to Proceed for the residential program. (The city’s

residential air source heat pump and/or central air conditioner program either must end once all the allocated funds are distributed to residents or the city can amend its pre-application to set aside more of its electric efficiency funds for the residential program to continue. This must be done in consultation with the IMEA program director.)

7. *IMEA reviews the final (or periodic) incentive request, resolves any issues, and pays the city.*

**ILLINOIS MUNICIPAL ELECTRIC AGENCY ELECTRIC EFFICIENCY PROGRAM  
PRE-APPLICATION CHECKLIST – MUNICIPALLY MANAGED RESIDENTIAL AIR SOURCE  
HEAT PUMP and/or CENTRAL AIR CONDITONER PROGRAM**

**Pre-Approval Application Checklist**

**Pre-Approval Application** must include:

- Completed Pre-Approval Application – the cover page and pages 7, and 9-11 of this application. (Found at <https://www.imea.org/EE%20Incentives.asp>.)
- Ancillary materials listed on page 11 item 2 of this application.

**To Submit a Pre-Application**

1. Gather materials listed above.
2. E-mail them to Rodd Whelpley at [rwhelpley@imea.org](mailto:rwhelpley@imea.org).

**If you have questions, e-mail Rodd Whelpley or call 217-789-4632.**

**ILLINOIS MUNICIPAL ELECTRIC AGENCY ELECTRIC EFFICIENCY PROGRAM  
FINAL APPLICATION CHECKLISTS – MUNICIPALLY MANAGED RESIDENTIAL AIR  
SOURCE HEAT PUMP and/or CENTRAL AIR CONDITONER PROGRAM**

**Final Application Checklist**

**Final Application** must include:

- A memo that includes: a) request for reimbursement to the city from IMEA and the total amount requested; b) the number of incentivized air source heat pumps and/or central air conditioning units for which the city is requesting reimbursement; c) the number of households in which the measures were installed, d) The total energy savings and demand savings achieved by the AC and/or ASHP units for which the city is requesting incentive reimbursement.
  
- FOR AIR SOURCE HEAT PUMPS: A spreadsheet that includes (at least) the following data fields (columns) for each unit:
  - The name of the resident.
  - The qualified residential location.
  - The make of the air source heat pump (e.g., Trane, York, etc.)
  - The model number of the air source heat pump
  - The installation date of the air source heat pump
  - The cooling capacity of the air source heat pump (in Btu/hr).
  - The heating capacity of the air source heat pump (in Btu/hr).
  - Indicate whether the air source heat pump is: ducted or ductless. [NOTE: minisplit units are not part of the IMEA program.]
  - Whether the resident retains an existing gas furnace or boiler for back-up heating.
  - The Seasonal Energy Efficiency Ratio (SEER2) of the air source heat pump.
  - The Energy Efficiency Ratio (EER2) of the air source heat pump.
  - The Heating Seasonal Performance Factor (HSPF2) of the air source heat pump.
  - The amount of the incentive paid to the resident.
  - The annual kWh savings attributable to the new, more efficient ASHP.
  - The kW savings at the time of city peak (annual demand savings) attributable to the new, more efficient ASHP.
  - The date the incentive was paid to the resident.

**NOTE:** Each incentivized unit is recorded on its own row of the spreadsheet (even if the customer installs – and is incentivized for – more than one unit in the same location). Failure to provide all necessary information required for a unit may jeopardize the city’s IMEA reimbursement for the residential incentive paid for that unit.
  
- FOR CENTRAL AIR CONDITIONERS: A spreadsheet that includes (at least) the following data fields (columns) for each unit:
  - The name of the resident.
  - The qualified residential location.
  - The make of the central air conditioner (e.g., Trane, York, etc.)
  - The model number of the central air conditioner
  - The installation date of the central air conditioner.
  - The cooling capacity of the central air conditioner (in Btu/hr).
  - The Seasonal Energy Efficiency Ratio (SEER2) of the central air conditioner.
  - The Energy Efficiency Ratio (EER2) of the central air conditioner.
  - The amount of the incentive paid to the resident
  - The annual kWh savings attributable to the new, more efficient Central AC
  - The kW savings at the time of city peak (annual demand savings) attributable to the new, more efficient Central AC
  - The date the incentive was paid to the resident.

**NOTE:** Each incentivized unit is recorded on its own row of the spreadsheet (even if the customer installs – and is incentivized for – more than one unit in the same location). Failure to provide all necessary information required for a unit may jeopardize the city’s IMEA reimbursement for the residential incentive paid for that unit.

**To Submit a Final Application**

1. Gather materials listed above **and/or see any special instructions sent to you with your Notice to Proceed.**
2. E-mail them to Rodd Whelpley at [rwhelpley@imea.org](mailto:rwhelpley@imea.org).

**If you have questions, e-mail Rodd Whelpley or call 217-789-4632.**

## APPLICANT CERTIFICATIONS

NOTE: If this project is approved and completed, then IMEA will send an Automated Clearing House (ACH) Payment Authorization Form to the applicant listed on this page. The incentive will be deposited into the account specified on the ACH form.

### Applicant hereby certifies and understands that:

- The project site receives wholesale electric service from IMEA or electric delivery service from an IMEA member municipal electric system.
- All authorizations required to perform the project described in this application have either been obtained or will be obtained no later than 90 days following the project beginning date set forth in the Notice to Proceed Letter issued by the IMEA.
- It has not been barred from contracting with a unit of state or local government as a result of a violation of Section 33E-3 or 33E-4 of the Criminal Code of 1961 (720 ILCS 5/33 E-3 and 5/33 E-4).
- The Illinois Prevailing Wage Act (820 ILCS 130/0.01) may apply and that incentive rebate recipients are responsible for determining if their projects will trigger compliance.
- As of the submittal date, the information provided in its application is accurate, and the individuals signing below are authorized to submit this application.
- The applicant, by accepting an offer or receiving an incentive for this electric efficiency project, acknowledges and agrees that IMEA and the IMEA member municipality may publicize the applicant as a participant in this electric efficiency program, including publicizing the applicant's name, the amount of all incentives offered and/or received by the applicant, the general nature of the electric efficiency projects the applicant has undertaken, and the estimated energy savings anticipated or derived from the energy efficiency projects the applicant has completed.
- Replaced equipment will be disposed of – not placed in storage.
- The applicant, by accepting an incentive for this electric efficiency project, acknowledges and agrees that any rights or abilities arising from kW savings that result from the execution of this project and that may be bid or sold into a Regional Transmission Operator market as energy efficiency or demand response or otherwise shall belong solely to IMEA.

## NARRATIVE DESCRIPTION OF THE PROJECT AND ADDITIONAL REQUIRED MATERIALS

1. In the space below (or as a separate attachment) please provide a short narrative of how your residential air source heat pump and/or central air conditioner program will operate.

2. Include with your pre-application to IMEA:

- a) The application your residents will use to receive an incentive from the city. **This is REQUIRED.** See appendix A (Air Source Heat Pump) and Appendix B (Central Air Conditioners) for examples. You may want to model your city's applications on these appendices, or, more likely, create your own.
- b) The excel spread sheet you will use to track program results – use all the required columns (see pages 3 – 5 of this application). **This is REQUIRED.**
- c) A copy of the content of – or a link to – your residential air source heat pump and/or central air conditioner program's Web page. *This is useful, but optional.*
- d) Any other ancillary materials that advertise or explain your residential air source heat pump and/or central air conditioner program. *This is useful, but optional.*

**APPENDIX A – Sample Residential Air Source Heat Pump Application **REVISED****

**<CITY or VILLAGE HERE>**

**Residential Air Source Heat Pump Incentive Program Application**

**<Program dates here>**

**Fill Out One Application Per Unit**

**Qualified Air Source Heat Pumps for this Program Are:**

New, residential-sized ( $\leq 65,000$  Btu/hr) ducted or ductless air source heat pumps (no minisplits) with specifications that meet or exceed the incentive baselines described in one of these three categories of specifications for incentivized units.

**Specifications for incentivized units:**

1. **Ducted or ductless units with a SEER2 greater than or equal to 15.2 and less than 17 (and meets EER2, HSPF2 and Tonnage requirements)**
  - The assumed efficient conditions are: SEER2  $\geq 15.2$ , EER2  $\geq 11.4$ , HSPF2  $\geq 8.1$  Tons  $< 3$
  - The incentive = \$900.00
  - Incentive is the same regardless of whether the customer retains a gas boiler or furnace for backup heating
2. **Ducted or ductless units with a SEER2 greater or equal to 17 and the resident retains the existing gas boiler or furnace for backup heating. (In addition, the unit meets EER2, HSPF2 and Tonnage requirements)**
  - The assumed efficient conditions are: SEER2  $\geq 17$ , EER2  $\geq 12.0$ , HSPF2  $\geq 8.5$  Tons  $\geq 3$
  - The incentive = \$1,400.00
3. **Ducted or ductless units with a SEER2 greater than or equal to 17 and the resident DOES NOT retain the existing gas boiler or furnace for backup heating. (In addition, the unit meets EER2, HSPF2 and Tonnage requirements)**
  - The assumed efficient conditions are: SEER2  $\geq 17$ , EER2  $\geq 12.0$ , HSPF2  $\geq 8.5$  Tons  $\geq 3$
  - The incentive = \$1,800.00

**NOTE:** Minisplit units are not incentivized in this program.

Heat Pump Make/Brand: \_\_\_\_\_

Heat Pump Model Number: \_\_\_\_\_

This Heat Pump (choose one)

Completely replaces the existing furnace or boiler

Will be used with the existing furnace, boiler or heating system remaining as a backup

Prior to installation of the air source heat pump, the heating system was or (if the current heating system is retained as a backup) will remain

Gas       Electric

Heat Pump is (choose one)

Ducted       Ductless

Cooling Capacity = \_\_\_\_\_ Btu/hr (Note: tonnage of unit x 12,000 = Btu/hr)

Heating Capacity = \_\_\_\_\_ Btu/hr (Note: tonnage of unit x 12,000 = Btu/hr)

SEER2 = \_\_\_\_\_

EER2 = \_\_\_\_\_

HSPF2 = \_\_\_\_\_

**INCENTIVE REQUESTED FOR THIS UNIT (check the description that most closely matches the specifications of your Air Source Heat Pump)**

Note: City will check this request against spec sheets and make the final determination of the eligible incentive amount.

Ducted/ductless unit with a SEER2 between 15.2 and 17\*      = \$ 900.00 incentive

Ducted/ductless unit with a SEER2 greater than 17 and the resident is retaining current gas boiler or furnace\*      = \$1,400.00 incentive

Ducted/ductless unit with a SEER2 greater than 17 and the resident is NOT retaining current gas boiler or furnace\*      = \$1,800.00 incentive

\* Note: See also other qualifying EER2 and HSPF2 assumptions listed in the “Specifications” section above. Failure to meet the assumed EER2, HSPF2 and heating and cooling capacity assumptions may affect your eligible incentive.
